

WMS

From stock. To success.

Boltrics Warehouse Management System

Boltrics

boltrics.com

Mounting pressure on your warehouse operations.

The world around you is changing faster than ever. Customers expect more visibility, error-free deliveries, and maximum flexibility. Meanwhile, margins are shrinking, workloads are rising, and outdated IT systems are holding you back.

Now is the time to evaluate your IT landscape. Is it slowing you down or driving you forward? Does it offer the flexibility and scalability needed to serve your customers at a high level? Can it already support tomorrow's processes today? The market is evolving. Is your software evolving with it?

The 3PL Industry IT Solution.

Boltrics offers a modular platform for WMS, TMS, and FMS, specifically built for logistics service providers, handing you an IT solution for scalable warehouse management.

While most systems are based on traditional ERP solutions that find their origin in finance or manufacturing, Boltrics is 100% focused on Third Party Logistics. From small local companies to global multi-nationals: every workflow, every feature is designed with and for logistics service providers. Resulting in an IT solution tailored to your business.

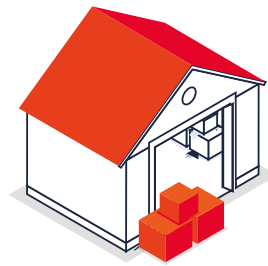

This leads to the Boltrics WMS, designed to grow with you. It supports multi-client warehousing, provides real-time insight per customer and location, and integrates seamlessly with e-commerce platforms, customs systems, and other ERP software. Smart picking methods and mobile apps ensure efficient operations on the warehouse floor.

From inbound to invoicing.

- ✓ Inventory management
- ✓ Reporting

- ✓ Invoicing
- ✓ MHE interfaces
- ✓ Stock locating
- ✓ Cycle counting
- ✓ Quality control

Fixed time. Fixed price.

No hourly billing, but a fixed price and a clearly defined timeline. That is how Boltrics implements software. Within a maximum of three months, your WMS is live, your key users are trained, and you hold the reins to optimize your processes.

Modular platform.

Boltrics' software platform is modular by design. That means you are never locked into the choices you make today. When your operation changes, your software adapts with you. You can easily activate new modules and workflows, or scale users up and down as needed. Through the Boltrics Marketplace, you benefit from preconfigured workflows and functionality based on best practices from more than 400 successful implementations. This way, your software grows with your logistics services, without the need to replace your entire IT solution.

Microsoft foundation.

Boltrics' WMS is built on Microsoft Dynamics 365 Business Central and fully hosted in the Microsoft Cloud. This means you automatically benefit from Microsoft's continuous innovations, including AI features such as Microsoft Copilot, seamless integrations with familiar tools like Outlook, Excel, and Teams, and predictive insights that make your operation smarter.

Start now. Expand later.

Full SaaS.

Thanks to the SaaS model, you are always up to date without the burden of IT maintenance. Microsoft provides automatic updates, maximum availability, and enterprise-level security. This allows your warehouse operation to work securely, flexibly, and future-proof.

Benefit from 3PL-specific functionalities. Always.

Multi-client warehousing.
Easily manage multiple customers within one warehouse environment.

Integrated invoicing.
Create and send invoices directly from your WMS.

Real-time inventory visibility.
Immediate insights into current stock levels and locations.

Flexible workflows.
Efficient processes in the office and on the warehouse floor.
